FOR IMMEDIATE RELEASE:

The Libertarian Party of Idaho calls for Thomas Massie to be made the head of the US Department of Agriculture in the coming Trump Administration. Representative Massie, the greatest champion of liberty currently in the United States Congress, is the best man there is to oversee the USDA. His personal experience farming and ranching on his property in Kentucky and his long record of standing against federal overreach and over-regulation of our food supply are unimpeachable. He knows that the people of America are more than capable of making their own decisions regarding their diets; that farmers and ranchers understand their business better than bureaucrats in Washington, DC; and that local forest services know what needs to be done to protect our communities from wildfires, with no need to pay lip service to political talking points about the "climate catastrophe." Massie is a no-nonsense, pragmatic, and effective leader who will bring the executive agencies to heel.

President-Elect Donald Trump, appoint Thomas Massie to head the US Department of Agriculture, and Make America Healthy Again!

Signed,
Chris Ward
Chair, Libertarian Party of Idaho
